

CLEMCO SANDBLASTING EQUIPMENT

Model SCWB 2452

CLEMCO sandblast machines

Model SC 1440—150 lb. sand capacity

Small, stationary, pressure sandblaster. Furnished with automatic pop-up valve, and small sand miser valve. Also available with 6-inch wheels.

Model SCW 1648—300 lb. sand capacity

Medium size portable sandblaster. Furnished with automatic pop-up valve, and small sand miser valve. Also available in stationary model.

Continuous action sandblasters

Models CA 2456 and CAD 2460

Used by shipyards, refineries, and larger contractors where continuous operation desired. No down time for refilling. Available with one or two sand control valves and with wheels. The highest production on the market.

Model SCWB 2452—600 lb. sand capacity (shown)

Most popular size portable sandblaster. Furnished with automatic pop-up valve, and large sand miser valve. Ideal for large contractors or major industries where large volume of blast cleaning is required. (At left).

Quick
couplings

Externally fitted
easy to attach
couplings eliminates
turbulence due to
internal couplings.
No tools required to
disconnect hoses.

for complete safety

Clemco recova remote control deadman valve

Provides 100 per cent safety to your blasters. Instant control at the nozzle will eliminate pot tenders, conserve on compressed air and abrasive. Easy to install on any blast pot regardless of manufacturer.

4 ply static proof sandblast hose

Designed exclusively for high production blasting. Highest grade construction gives long life. Static tube eliminates need of static wire.

Increase blasting efficiency with CLEMCO

Suction gun—Model SG 300

Designed for light duty blasting or where limited air supply available. Many advantages: light weight, steady abrasive supply, clean radius and angles, remove rust, paint, mill scale. Uses most common abrasives. No special skill required.

Venturi style nozzles

Harder hitting more uniform pattern gives more square foot production per hour. Tungsten carbide lined for longer life. Available in both long and short lengths.

Canvas hoods
Air fed helmets
Wet blast head
Angle nozzles
Water traps
Nozzle holders
or hose ends

CLEMCO SANDBLASTING EQUIPMENT

Clemco Educt-O-Matic portable blast cleaner

Truly, the only portable blast cleaner with a vacuum pick up for dust and abrasive. Ideal for spot cleaning welds, tank linings, floors, or in machinery areas. No flying abrasive or dust problem to worry about—resuses abrasive many times. Lightweight—only 11 pounds loaded with abrasive.

Air pressure only
—No electrical connections
Compact—easy to use
Flexible head
Uses many abrasives
Special attachments available
Cleans to white metal

Clemco wet or dry blast rooms

Pre-fabricated rooms built to customer specifications for cleaning large parts. Equipped with dust collectors, etc.

Wet hone jr.

The smallest Clemco wet cabinet. Ideal for cleaning small, critical tolerance parts. Used by tool rooms, die casters, etc.

Wet hone machine

Large, high production wet cabinets. Made in several sizes with special abrasive pump. Tops in visibility and ease of operation.

And accessories

Clemco pulsair gun Model A-1

Increase blasting production 30% to 200%—
the tougher the job, the greater the increase!

Install on all sandblasters regardless of make or model. Extensive tests plus many field applications show big savings in air and abrasive. Comparison tests indicate that the Pulsair Gun, which consumes 200 CFM, will equal the production of a one-half inch orifice nozzle consuming 412 CFM of air. Proportionate savings in abrasive will be found.

Clemco sand miser valve

Fits most sandblast machines

The most accurate, maintenance free valve available. Controls the flow of abrasive to the nozzle. Rugged construction provides years of service. Simple to clean out if plugged—just remove pipe plug.

Wet blast head

Dust arrestor for use in cleaning masonry or stucco buildings. Surrounds area being cleaned with atomized water spray. Permits excellent visibility and stops flying dust. Will fit all sandblast machines.

Torno blast pipe cleaner

Clean pipe or tubing without rotation.
Sizes $\frac{1}{2}$ " to 12" inside diameter.

Clean to white metal any length of the above sizes. Fits any conventional sandblast machine. Cuts pipe cleaning costs 40 to 60 per cent. Have your local Clemco distributor demonstrate this new tool.

PRICE SHEET SANDBLASTING EQUIPMENT

CLEMCO "MIGHTY MITE" Model 1028

50 lb. sand capacity ASME approved vessel

Includes: One (1) sandblast machine on two (2) rubber tired wheels
with all operational fittings and piping
One (1) 15 ft. lgth. 1/2" I.D. H.D. sandblast hose with
quick couple fittings
One (1) 3/16" tungsten carbide nozzle
One (1) heavy duty canvas helmet
Ten (10) extra helmet glass fronts

NET price, f.o.b. N.J. whse. \$259.00
Shipping weight 75#

CLEMCO "GREEN GIANT" Model 1440

150 lb. sand capacity ASME approved vessel

Includes: One (1) sandblast machine on two (2) rubber tired wheels
with all operational fittings and piping
Two (2) 25 ft. lgths. 3/4" I.D.H.D. sandblast hose with
quick couple fittings
One (1) 3/16" tungsten carbide nozzle
One (1) heavy duty canvas helmet
Ten (10) extra helmet glass fronts

NET price, f.o.b. N.J. whse. \$425.00
Shipping weight 250 #
